

Aircraft Leasing Services

Broad expertise

“The global aircraft leasing market is expected to reach a market value of USD 62,221.8 million by the end of 2023.”¹

Fast, effective transaction management support is important when you finance and lease aircraft globally. Our aircraft leasing teams provide you with that support from transaction closing to maturity for lease in/lease out (LILLO) aviation transactions and financing or operating leasing deals.

We establish financing and holding structures, including special purpose vehicles (SPVs). Once your deal has been executed our expert team manages corporate compliance and governance obligations, as well as lease administration and accounting and reporting requirements. We also work with new leasing companies establishing platforms in new jurisdictions.

So whatever your specific needs are we can help.
