

Global Energy Companies

Support Services

Broad expertise.

Tailored services.

We have a dedicated desk for energy clients staffed by experienced accountants and legal professionals with extensive expertise in the energy sector. This allows us to deliver the best possible solutions, and if desired a one-stop shop, for energy companies while keeping pace with relevant industry and regulatory developments.

Our experts have worked with some of the leading energy companies, energy equipment suppliers and international banks and made significant contributions to the implementation of key projects across this asset class. We have a proven track record with establishing and maintaining a range of structures for investment, financing and operational purposes. These structures include holding companies, operating companies and special purpose vehicles (SPVs), such as the Dutch foundation for cross border or structured finance purposes.
