WHAT IS THIS PRODUCT?

Type:

UCITS. The Class AA (EUR) Accumulating has been selected as being representative of Class AA (EUR) Distributing, and as such a separate PRIIP has not been prepared for this share class.

Term:

This product is not subject to any fixed term.

Objectives:

To provide investors with long term capital growth by investing in shares of medium sized companies on a global basis.

Intended Retail Investor:

A typical investor will be seeking to achieve a return on their investment in the medium to long term.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

Recommended minimum holding period: 7 years Investment 10 000 EUR			
Survival Scenarios Minimum:		1 year	7 years (recommended holding period)
Stress scenario	What might you get back after costs	1 760 EUR	1 200 EUR
	Average return each year	- 82.39 %	- 26.09 %
Unfavourable scenario	What might you get back after costs	7 300 EUR	6 550 EUR
	Average return each year	- 26.98%	- 5.86%
Moderate scenario	What might you get back after costs	11 040 EUR	18 280 EUR
	Average return each year	10.38%	9%
Favourable scenario	What might you get back after costs	16 330 EUR	22 510 EUR
	Average return each year	63.32%	12.29%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 09/2021 and 09/2022.

Moderate: This type of scenario occurred for an investment between 11/2011 and 10/2018.

Favourable: This type of scenario occurred for an investment between 10/2011 and 09/2018.

WHAT HAPPENS IF IQ EQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

You may face a financial loss should the Investment Manager or Depositary, Northern Trust Fiduciary Services (Ireland) Limited, default on their obligations. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled. Further details are available from the Manager.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment 10 000 EUR	If you exit after 1 year	If you exit after 7 years
Total costs	121 EUR	1 599 EUR
Annual Cost Impact*	1.21 %	1.31 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.31% before costs and 9.00% after costs.

(Where applicable): We may share part of the costs with the person selling you the product to cover the services they provide to you. (Where applicable) [They will inform you of the amount].

(Where applicable): These figures include the maximum distribution fee that the person selling you the product may charge ([] % of amount invested / [] EUR). This person will inform you of the actual distribution fee.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended minimum holding period: 7 years

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the fund's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended minimum, this may have a negative impact on the fund's risk and reward profile. You may request to redeem the units held at any moment, in accordance with the Prospectus of the fund. Any costs are shown under "Composition of costs" above.
