Objectives and Investment Policy

The Fund's investment objective is to seek capital appreciation by investing in equity securities of companies in emerging markets which are traded on exchanges or recognised markets located in emerging markets.

The Investment Manager intends to achieve the Fund's investment objective primarily by value investing. Value investing seeks to profit by purchasing securities when the price is low and holding the securities until the price increases. The Investment Manager will also use a value-income approach, which incorporates dividend yield and fundamental catalyst thesis. Further information on these methods is available under the "Investment Strategy" section of the Fund Supplement.

The Fund will invest primarily in equity securities of companies in emerging markets which are traded on exchanges or recognised markets located in emerging markets. These equity securities may include common stock, preferred stocks and convertible preferred securities of companies in emerging market countries. The Investment Manager expects to invest in emerging market companies in India, Brazil, Turkey, Taiwan, Mexico, China, South Africa, Peru, Thailand, Israel, Qatar, Hong Kong, Malaysia, Indonesia, Poland, South Korea, Chile, Colombia, Czech Republic, Hungary, and the Philippines however this is not an exhaustive list. The Fund may invest in companies with limited operating histories and will not have a particular industry focus. The Fund may also buy debt securities (such as bonds, notes and debentures) issued by emerging market companies, as well as those issued by emerging market governments. These may be at a fixed or floating rate. The Fund will not invest more than 10% of its Net Asset Value ("NAV") in debt securities including in non-government issued debt securities.

The Fund may invest in American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), and Global Depositary Receipts ("GDRs") and up to 10% of its NAV in Exchange Traded Funds ("ETF"s), which are described in greater detail in the Fund Supplement.

The Fund is actively managed by the Investment Manager and measures its performance against the MSCI Emerging Markets Index (the "**Index**").

The Fund may invest a substantial portion of NAV directly or indirectly in cash, cash equivalents, bank deposits, and/or similar instruments including short term high quality obligations of corporate issuers or high quality short-term Money Market Instruments including fixed and variable rate treasury bills, commercial paper and certificates of deposit. With the exception of unlisted securities, the Fund will invest in a diversified portfolio of equity securities which shall principally be listed, traded or dealt in on one or more of the Markets referred to in the Fund Supplement.

This Fund is classified as Article 6 under SFDR. As part of its investment decision-making process, the Investment Manager assesses companies with respect to ESG. Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'. With a category 6 fund, the risk of losing your money is higher but there is also a chance of making higher gains.
- The Fund is in category 6 because of the above average range and frequency of price movements of the underlying investments

The indicator does not take account of the following risks of investing in the Fund:

- Although the Fund will strive to reduce counterparty credit risk, there is no assurance that a counterparty will not default or that the Fund will not sustain losses as a result.
- The Fund may at times invest in securities that are inherently less liquid and more difficult to sell.
- The Fund may be exposed to the creditworthiness and performance of one or more counterparties.
- Investing in emerging markets involves a greater degree of risk than investments in more developed European countries.
- The Fund's success may be affected by general economic and market conditions that could adversely impact the Fund's profitability or result in losses.

For a full list of possible risk factors please see section entitled "Risk Factors" set on in the Prospectus and Fund Supplement.
