The degree of deviation from the Performance Benchmark may be significant. ### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'. With a category 4 fund, the risk of losing your money is higher but there is also a chance of making higher gains.
- The Fund is in category 4 because of the above average range and frequency of price movements of the underlying investments

The indicator does not take account of the following risks of investing in the Fund:

Although the Fund will strive to reduce counterparty credit risk, there is no assurance that a counterparty will not default or that the Fund will not sustain losses as a result.

The Fund may at times invest in securities that are inherently less liquid and more difficult to sell.

The Fund may be exposed to the creditworthiness and performance of one or more counterparties.

The Fund invests in equities globally and is, therefore, exposed to fluctuations in currency exchange rates as well as unstable currencies in certain developed and emerging markets.

Investing in emerging markets involves a greater degree of risk than investments in more developed European countries.

The Fund's success may be affected by general economic and market conditions that could adversely impact the Fund's profitability or result in losses.

For a full list of possible risk factors please see section entitled "Risk Factors" set on in the Prospectus and Fund Supplement.
