Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'. With a category 5 fund, the risk of losing your money is higher but there is also a chance of making higher gains.
- The Fund is in category 5 because of the above average range and frequency of price movements of the underlying investments

The indicator does not take account of the following risks of investing in the Fund:

- Although the Fund will strive to reduce counterparty credit risk, there is no assurance that a counterparty will not default or that the Fund will not sustain losses as a result.

- The Fund may at times invest in securities that are inherently less liquid and more difficult to sell.
- The Fund may be exposed to the creditworthiness and performance of one or more counterparties.
- The Fund invests in equities globally and is, therefore, exposed to fluctuations in currency exchange rates as well as unstable currencies in certain developed and emerging markets.
- Investing in emerging markets involves a greater degree of risk than investments in more developed European countries.
- The Fund's success may be affected by general economic and market conditions that could adversely impact the Fund's profitability or result in losses.

For a full list of possible risk factors please see section entitled "Risk Factors" set on in the Prospectus and Fund Supplement.
