Fortem Capital Alternative Growth Fund

A sub-fund of Skyline Umbrella Fund ICAV

Class A Accumulating shares in Sterling

ISIN: IE00BJ116W86

Investment Manager: Fortem Capital Limited

Fund Manager: IQ EQ Fund Management (Ireland) Limited (the "Manager")

Investment Objective, Policies and Strategies

- ~ The investment objective of the Fund is to generate capital growth over the medium to longer term, whilst exhibiting low correlation to equity markets.
- ~ The Fund may invest without limit, in developed and emerging market equities, equity related securities (such as equity market indices), fixed income securities, collective investment schemes (CIS), cash and equivalents, as well as indirect exposure to other asset classes such as real estate, infrastructure, fx and commodities.
- ~ The Fund may also invest indirectly in these securities through Financial Derivative Instruments ("FDI") including but not limited to swaps and options. In particular, the Fund will invest indirectly in the following equity market indices: FTSE 100, S&P 500, Eurostoxx 50, Russell 2000, Swiss Market Index and Nikkei 225 but may invest in other indices from time to time (together the "**Indices**"). A list of all of the Indices in which the Fund invests at any one time is available to investors from the Investment Manager on request.
- ~ The Fund will not be subject to any geographic, sector or market capitalisation constraints.
- ~ The Investment Manager has the discretion to consider which Indices, equities or bonds may generate a return for the Fund and the overall allocation of investment in same. This is done through research using own proprietary databases and external services
- ~ On demand, you may buy or sell your shares on any Business Day, being a weekday on which commercial banks in Ireland and United Kingdom (and in any other financial centre that the Directors may determine to be relevant for the operations of the Fund) are open for normal banking business.
- ~ Income and capital gains arising in respect of the shares will be reinvested and reflected in its Net Asset Value per share.
- ~ The Fund is suitable for investors who are seeking capital growth over a medium to long term horizon, but who are willing to tolerate medium to high risks due to the potentially volatile nature of the investments.
- ~ The Fund is actively managed with reference to the Indices as the Fund invests indirectly in the Indices through FDI meaning the Fund's portfolio holdings are based upon the holdings of the Indices. Investment in the Indices by the Fund may constitute a significant portion of the Fund in normal market conditions. The Investment Manager's deviation from the Indices may be significant. Indices are not being used for performance comparison purposes. The Fund is targeting an annual performance that may vary year to year.

Risk and Reward Profile

- ~ The lowest category does not mean 'risk free'.
- ~ The Fund's risk category shown is not guaranteed and may change in the future for various reasons including general market developments and changes such as geo-political factors.
- ~ The risk category selected is based upon simulated historical data and is consistent with the Fund's risk profile at inception. However, any historical data may not be a reliable indicator of future returns.
- ~ The value of investments and the income from them and therefore the value of, and income from the Shares in the Fund, may go down as well as up and an investor may not get back the amount he or she invests.
- ~ Correlation between two or more underlyings i.e. how closely two or more underlying's prices move in relation to one another.
- ~ Particular risks not adequately covered by the risk indicator include:
 - ~ The fund is rated 4 due the nature of its investments which includes the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses:
 - ~ The performance of the underlying(s);
 - ~ Interest rates;
 - ~ Dividends;
 - ~ **Credit spreads** i.e. an improvement or deterioration in the perceived credit quality of an issuer, by the financial market;
 - ~ **Implied volatility** which is a financial market measure of the perceived prevailing risk in an underlying i.e. the higher the implied volatility of an underlying the greater the perceived risk that an underlying price may change significantly positively or negatively.
 - ~ The Fund may use total return swaps for investment purposes to gain economic exposure to the equities and the Indices. Up to 100% of the NAV of the Fund may be invested in total return swaps. The approved counterparty may provide collateral to the Fund, including cash, treasury bills and other high-quality government bonds with a maturity of up to 7 years.
- ~ **Counterparty Risk:** The Fund may enter into over-the-counter ("OTC") FDIs with approved counterparties. If an approved

counterparty defaults, there is a risk that the Fund will lose all or some of the value of that FDI.

- ~ **Issuer Risk:** The insolvency of any institution that is the issuer of a Bond held by the Fund may expose the Fund to financial loss.
- ~ Any investment in any Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

- ~ The Fund may construct strategies using FDIs that are long-only, short-only or combinations of long and short by investing indirectly in the underlying assets. The aggregate value of long positions is expected to be approximately 300% of its Net Asset Value ("NAV"). The notion of short positions is expected to be approximately 150% of NAV.
- ~ Investors should refer to the prospectus, which can provide more information on risks.
