WHAT IS THIS PRODUCT?

Type:

AIF

Term:

This product is not subject to any fixed term.

Objectives:

The objective of The Managed Fund is to seek to achieve capital appreciation. The objective will be achieved by investing in a range of assets which will be primarily equities, investment grade bonds, property and cash. IQ EQ Fund Management (Ireland) Limited as Investment Manager will vary the proportion of The Managed Fund invested in each asset class in line with its views on the relative growth potential of each sector and consistent with its policy of maintaining a diversified portfolio.

Intended Retail Investor:

The Product is targeted at investors who have significant assets with IQ EQ Fund Management (Ireland) Limited. The investor's objective for this investment should be aligned with that of the Product as outlined above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 1 years Investment 10 000 EUR		
Survival Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 years (recommended holding period)
Stress scenario	What might you get back after costs	2 630 EUR
	Average return each year	- 73.7 %
Unfavourable scenario	What might you get back after costs	8 950 EUR
	Average return each year	- 10.48 %
Moderate scenario	What might you get back after costs	10 710 EUR
	Average return each year	7.14 %
Favourable scenario	What might you get back after costs	12 850 EUR
	Average return each year	28.47 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 01/2022 and 12/2022.

Moderate: This type of scenario occurred for an investment between 10/2016 and 09/2017.

Favourable: This type of scenario occurred for an investment between 04/2020 and 03/2021.

WHAT HAPPENS IF IQ EQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

You may face a financial loss should the Investment Manager or Depositary, Northern Trust Fiduciary Services (Ireland) Limited, default on their obligations. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled. Further details are available from the Manager.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment 10 000 EUR	If you exit after 1 year
Total costs	76 EUR
Cost Impact	0.76 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.76% before costs and 0.00% after costs.
