### WHAT IS THIS PRODUCT?

#### Type:

UCITS investment company

#### Term:

This product is not subject to any fixed term. However, the Board of Davy Fund plc, at their discretion, can redeem all the Shares of the Fund under the circumstances set out in the Redemptions section of the Prospectus.

#### Objectives:

The investment objective of the Fund is to generate income by predominantly taking positions in a variety of CIS. The Fund is actively managed in terms of selection of investments. Income is not paid out and is rolled up (accumulated) into the value of your investment. You may buy and sell your investment on each business day.

#### Intended Retail Investor:

A typical investor will be seeking to achieve exposure to fixed income, adjustable rate securities or Deposits and a return on its investment in the short to medium term. Investors must be able to bear the total loss of the invested amount.

**Depository:** Northern Trust Fiduciary Services (Ireland) Limited

**Further information:** Investors can find further information online at <https://iqeq.com/davy-funds-plc/>, free of charge (e.g., Prospectus, annual reports, semi-annual reports, factsheets, daily prices and information about other share classes). The prospectus and periodic reports are prepared for Davy Funds plc as a whole, in English. The assets of one sub-fund will not be available to meet the liabilities of another, though other jurisdictions may not recognise such segregation.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

#### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as class 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the fund to pay you.**

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Fund may be exposed to other materially relevant risks not adequately captured by the risk indicator. See Risk Factors sections of the Prospectus and Supplement. This product does not include any protection from future market performance so you could lose some or all of your investment.

#### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 3 years Investment 10 000 EUR			
Survival Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 year	If you exit after 3 years (recommended holding period)
<b>Stress scenario</b>	<b>What might you get back after costs</b>	7 920 EUR	<b>8 140 EUR</b>
	Average return each year	-20.75 %	- 6.64 %
<b>Unfavourable scenario</b>	<b>What might you get back after costs</b>	8 610 EUR	<b>8 350 EUR</b>
	Average return each year	-13.86 %	- 5.82 %
<b>Moderate scenario</b>	<b>What might you get back after costs</b>	10 040 EUR	<b>10 160 EUR</b>
	Average return each year	0.39 %	0.52 %
<b>Favourable scenario</b>	<b>What might you get back after costs</b>	10 760 EUR	<b>10 910 EUR</b>
	Average return each year	7.64 %	2.95 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 11/2020 and 10/2023.

Moderate: This type of scenario occurred for an investment between 04/2015 and 03/2018.

Favourable: This type of scenario occurred for an investment between 08/2018 and 07/2021.

## WHAT HAPPENS IF J&E DAVY IS UNABLE TO PAY OUT?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment 10 000 EUR	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	<b>90 EUR</b>	<b>276 EUR</b>
Annual Cost Impact*	0.9 %	0.9 %

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.42% before costs and 0.52% after costs.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

---

**Recommended minimum holding period: 3 years**

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the fund's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended minimum, this may have a negative impact on the fund's risk and reward profile. You may request to redeem the units held at any moment, in accordance with the Prospectus of the fund. Any costs are shown under "Composition of costs" above.
