Term:

Objectives:

The Fund aims to generate long term returns by investing primarily in European equity and equity-linked securities. The Fund aims to achieve this investment objective by investing primarily in equity and equity-linked securities of European issuers (such as debentures, notes or preferred stock) that are traded on exchanges or recognised markets or over the counter, in both developed and emerging European markets. The Fund may also invest in companies that have a significant exposure to Europe and may be located in any part of the world. The Investment Manager generally seeks diversification rather than concentration by industry, country or currency. However, the Fund may have significant concentration in particular industries from time to time. The Fund may invest in pooled real estate investment vehicles such as real estate investment trusts. For short-term cash management, the Fund may invest in cash and/or investment grade money market instruments with maturities up to one year. The Fund is managed in reference to MSCI Europe Index (Net) USD (the "Benchmark") The Fund's performance is compared to the Benchmark in marketing materials and the performance fee for the Fund is calculated based on the Benchmark, as disclosed under the heading "Performance Fee" within the Fund Supplement. The Fund's investment policy is not constrained and the degree of deviation from the Benchmark may be significant. Shares in the Fund can be bought and sold on any business day in Ireland. Recommendation: this Fund may not be appropriate for short-term investment. Please refer to the Prospectus and Fund Supplement for more detailed information.

Intended Retail Investor:

The Fund is suitable for investors seeking capital growth through direct and/or indirect investment in a diversified portfolio of European equities who are prepared to accept a medium to high degree of volatility.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The fund may be exposed to other materially relevant risks not adequately captured by the risk indicator. See Risk Factors sections of the Prosepectus and Supplement. This product does not include any protection from future market performance so you could lose some or all of your investment.

WHAT HAPPENS IF ARGA INVESTMENT MANAGEMENT, LP IS UNABLE TO PAY OUT?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). There is no compensation or guarantee scheme in place (in Ireland where the Fund is domiciled) for losses suffered by investors.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended minimum holding period: 4 years

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the fund's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended minimum, this may have a negative impact on the fund's risk and reward profile. You may request to redeem the units held at any moment, in accordance with the Supplement of the fund. Any costs are shown under "Composition of costs" above.
