## Risk and Reward Profile

- ~ The lowest category does not mean "risk free".
- ~ The Fund's risk category shown is not guaranteed and may change in the future for various reasons including general market developments, economic cycles and changes such as geo-political factors.
- ~ The risk category selected is based upon the Fund's past performance, is an indicator of how much the Fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. However, any historical data may not be a reliable indicator of future returns.
- ~ The value of investments and the income from them and therefore the value of, and income from the Shares in the Fund, may go down as well as up and an investor may not get back the amount he or she invests.

- ~ Particular risks not adequately covered by the risk indicator include:
  - o **Counterparty Risk:** The Fund may enter into over-the-counter ("OTC") FDIs with approved counterparties. If an approved counterparty defaults, there is a risk that the Fund will lose all or some of the value of that FDI.
  - o **Issuer Risk:** The insolvency of any institution that is the issuer of a Bond held by the Fund may expose the Fund to financial loss.
- ~ The Fund has been classed as 3 because its historical volatility has been measured as average.
- ~ Portfolio Currency Risk: As the Fund invests in overseas securities, movements in exchange rates may cause the value of your investment to increase or decrease.
- ~ The fund may be exposed to other materially relevant risks not adequately captured by the risk indicator. See the "Risk Factors" sections of the Prospectus of the Company and Supplement of the fund.
