WHAT IS THIS PRODUCT?

Type:

AIF

Term:

This product is not subject to any fixed term.

Objectives:

The investment objective of the Portfolio is to achieve capital appreciation over the long term. There is no assurance or guarantee that this objective will be achieved. The Portfolio Investment Manager will seek to achieve the Investment Objective by investing globally in a diversified multi-asset-class portfolio based on a systematic approach. The Portfolio Investment Manager may achieve its investment objective by investing in financial derivative instruments and intends to invest predominantly on a long basis but may also engage in short positions.

Intended Retail Investor:

An investment in the Sub-Fund can only be made against a minimum allocation of at least EUR 100,000. The Product is targeted at investors who have subscribed for Units via a distribution agreement with an affiliate of IQ EQ Fund Management (Ireland) Limited. The investor's objective for this investment should be aligned with that of the Product as outlined above. This KID should be read in conjunction with the "Information for investors in The Netherlands" or "Information for investors in The Switzerland" sections of the Fund's supplement.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 10 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Fund to pay you.

Be aware of any potential currency risk. This risk is not considered in the indicator shown above.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best past performance of the modelled assumptions for the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 10 years Investment 100 000 EUR				
Survival Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 year	If you exit after 5 years	If you exit after 10 years (recommended holding period)
Stress scenario	What might you get back after costs	56 570 EUR	45 840 EUR	31 620 EUR
	Average return each year	-43.43 %	-14.44 %	-10.88 %
Unfavourable scenario	What might you get back after costs	86 850 EUR	109 680 EUR	109 680 EUR
	Average return each year	-13.15 %	1.87 %	0.93 %
Moderate scenario	What might you get back after costs	108 950 EUR	174 410 EUR	274 430 EUR
	Average return each year	8.95 %	11.77 %	10.62 %

	Average return each year	41.65 %	15.75 %	11.37 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 12/2024 and 12/2025.

Moderate: This type of scenario occurred for an investment between 09/2015 and 08/2025.

Favourable: This type of scenario occurred for an investment between 10/2015 and 09/2025.

WHAT HAPPENS IF IQ EQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 100 000 is invested.

Investment 100 000 EUR	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
Total costs	1 369 EUR	12 265 EUR	39 956 EUR
Annual Cost Impact*	1.37 %	1.53 %	1.51 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.14% before costs and 10.62% after costs.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended minimum holding period: 10 years

The recommended holding period for the Fund is 10 years. The Fund is an open ended Fund and the Directors of the Fund, at their discretion, may provide liquidity from the fund on a daily basis. Given the expected returns profile of the fund, investors are not recommended to hold the fund for periods of less than 10 years. In certain circumstances, liquidity may be limited where redemptions exceed 25% of the Net Asset Value, and an anti-dilution levy may be applied upon redemption.
