You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

Type:

The Fund is an alternative investment fund and a sub-fund of Formuesforvaltning Private Markets Plc (the "Company") which is an investment company incorporated in Ireland on 14 December 2006 under registration number 431649 and authorised by the Central Bank of Ireland.

Term:

This product is not subject to any fixed term.

Objectives:

Multistrategy Hedge (the "Fund") aims to provide an attractive risk-adjusted return by investing in high-quality global hedge fund mandates. The majority of the underlying funds in Multistrategy Hedge have a value-oriented investment philosophy. In principle, hedge funds are not a separate asset class, but actively managed funds that invest in one or more asset classes using several different investment strategies. Exposure in the Fund seeks to be diversified through asset classes such as shares, fixed income instruments, foreign exchange and commodities. The underlying funds have different management strategies such as shares long/short, event-driven, multi-strategy, credit, systematic/quantitative and macro. The underlying funds may also invest in mutual funds that provide exposure to other strategies or instruments. The word "hedge" means protected. Underlying managers use long, short, cash and derivatives as an integral part of their management strategy. The Fund targets annualized volatility of returns of approximately 6%-8% per annum.

Other features of the product which the typical investor should know:

- The base currency of the Fund will be US Dollar (US\$) and the share class's base currency is Norwegian Kronor (NOK).
- The Fund may hold cash and other liquid instruments in order to manage cash flows or as a defensive market strategy in abnormal market situations.
- The Fund is managed by IQ EQ Fund Management (Ireland) Limited.

Intended Retail Investor:

The Fund is suitable for investors who are willing to tolerate medium volatility and who are seeking a portfolio which has a medium to long term horizon.

Practical information:

The Depositary is Northern Trust Fiduciary Services (Ireland) Limited

The Prospectus together with the Supplement, annual report and other practical information are available free of charge in English at <https://iqeq.aifusion.io/login>

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

Be aware of currency risk. If your currency is different from the currency in which the Fund is denominated, the final return you get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 years Investment 100 000 NOK		
Survival Scenarios		5 years (recommended holding period)
Minimum:	What might you get back after costs	74 150 NOK
Stress scenario	Average return each year	-5.81 %
Unfavourable scenario	Average return each year	0.71 %
Moderate scenario	Average return each year	5.75 %
Favourable scenario	Average return each year	7.73 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 12/2024 and 11/2025.

Moderate: This type of scenario occurred for an investment between 03/2020 and 02/2025.

Favourable: This type of scenario occurred for an investment between 11/2016 and 10/2021.

WHAT HAPPENS IF IQ EQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The Fund's assets are legally separated from the PRIIP Manufacturer's. The Fund's assets are held by the Depositary. You may face a financial loss in the event of a default, insolvency or compulsory wind-up of the Depositary. However, this risk is mitigated to a certain extent by the fact that the Depositary is required to segregate its own assets from the assets of the Fund. Losses are not covered by any investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- NOK 100 000 is invested.

Investment 100 000 NOK	If you exit after 5 years
Total costs	11 544 NOK
Cost Impact	1.79 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.53% before costs and 5.75% after costs.
