BELT Solutions in 3 minutes

BELT Solutions is an innovative and independent digital solution that allows users to manage, monitor and control their compliance and internal control framework, while ensuring the traceability of their activities and following up on the regulatory changes.

This RegTech SaaS provides access to regulatory references, control sheets, reports and updated systems.

BELT Solutions is both a gateway to regulatory records and a compliance monitoring tool. Users can customise the non-compliance risk matrix which allows a clear and continuous assessment of compliance threats.

Meanwhile, IQ-EQ provides the regulatory oversight and contributes to the regulatory update of the software, the control sheets and the test grids.

Key features

Automated regulatory watch

Provides real-time updates on evolving regulations and integrates them into control sheets

One-click reporting and control plans

Instantly generates detailed reports and summaries, simplifying internal audits and client communications

Collaborative workflows

Integrates workflows between compliance officers and other stakeholders, ensuring seamless task assignment, follow-ups, and approvals

First-level declaration features

Logs and manages incidents, gifts, personal transactions, and more, with traceability and alerts

BELT innovation

Digitalisation

All 1st, 2nd, and 3rd-level controls are performed on the platform

Security

Testimonials from our clients

"The advantage observed for our clients is the ease of generating a control report at any time in just a few seconds. This is a guaranteed time saver for compliance officers. When the report is generated, non-compliance points are immediately highlighted".

- Head of Compliance, Asset Management Company

"BELT has become our daily working tool for essential smoothness and time savings. The entire compliance team is delighted with this support".

- Compliance manager, Private Equity Company
